

COMMUNITY INFORMATION DAY

Thursday 19th February 2015, 4pm – 7pm
Bannister Hall, Bannister Lane

The Gullen Solar Farm is the proposed development of a 10-12 MW solar photovoltaic (PV) power plant. It is in early stages of planning.

The project would be co-located with the existing Gullen Range Wind Farm approximately 11km south east of Grabben Gullen, 19km south of Crookwell and 28km north west of Goulburn.

The community is invited to drop in, find out about the proposed development and provide feedback. Members of the Gullen Solar Farm team will be available to answer questions and discuss the plans. Tea and biscuits will be available.

Gullen Solar Farm is committed to community consultation throughout project development. Further information can be found on the project website or contact Gullen Solar Farm staff.
