

2nd COMMUNITY INFORMATION DAY

Wednesday 25th November 2015, 4pm – 7pm
Bannister Hall, Bannister Lane

The Gullen Solar Farm is the proposed development of a 10-12 MW solar photovoltaic (PV) power plant.

The project would be co-located with the existing Gullen Range Wind Farm approximately 11km south east of Grabben Gullen, 16km south of Crookwell and 28km north west of Goulburn.

The community is invited to drop in, find out the latest about the proposed development and provide feedback. Members of the Gullen Solar Farm team will be available to answer questions and discuss the plans.

A Development Application for the project will be submitted to Upper Lachlan Shire Council in December 2015, with determination made by the Joint Regional Planning Panel.

Gullen Solar Farm is committed to community consultation throughout project development. Further information can be found on the project website or contact Gullen Solar Farm staff.
